

CENTURY UV SECURITY MARKER

Directs of Use:

- Open cap. Shake the marker well before first use.
- To push ink press the nib a few times until you see the ink on the tip.
- Put the cap back on after each use.

Advantage

- Century's UV Security Marker is a felt tip paint marker with applications in wide range of industries including hospitality industry, hotel industry, manufacturing, security etc.
- It is made up of a hard aluminum body filled with ink and felt-tip with valve action for smooth ink flow.
- The ink is xylene free.
- It's Permanent & weather proof markings on all surfaces.
- Its markings are not visible in normal light & only visible in black light or 'UV light'.
- It is also known as an invisible marker as the markings are not visible under normal daylight.
- It works on all porous & non-porous surfaces including metal, plastic, glass, ceramic, rubber, ceramics, concrete and stone.
- It is also used in manufacturing units, automobile industry, event industry, repair workshops, laundry, clubs, army, hotels & hospitals for quality checks and security markings.
- The marker is very popular in Europe & America and widely used across all kinds of sectors.

Caution:

- Avoid contact from eyes or flames.
- Ink is harmful if consumed.
